# ARS Success Stories

*May/June 2025*

## **Jeff Garrett**

Jeff began his services with ARS in 2025. He was referred to ARS by a friend for hearing aids. His current position as a Welding Excavator made it difficult for him to work and hear in all settings due to bilateral hearing loss. ARS was able to purchase hearing aids for the client so that he may maintain his employment. When asked about how he feels about the services he received, he wrote a heartfelt statement:

*"I never knew that there was an agency in this day and age to help me with my condition. I've been around the block twice or more, but ARS was wonderful in helping being able to hear again. I never realized my hearing problem till I received help through ARS. My boss and co-workers are very happy that I can hear and now ask repetitive questions all day. I'm very thankful for ALL the help I have received."*
